

Launch of CAFÉ HA'MESSILA on the Railway Park - A joint event of activists from Beit Tzapafa Katmonim and the artists' workshops

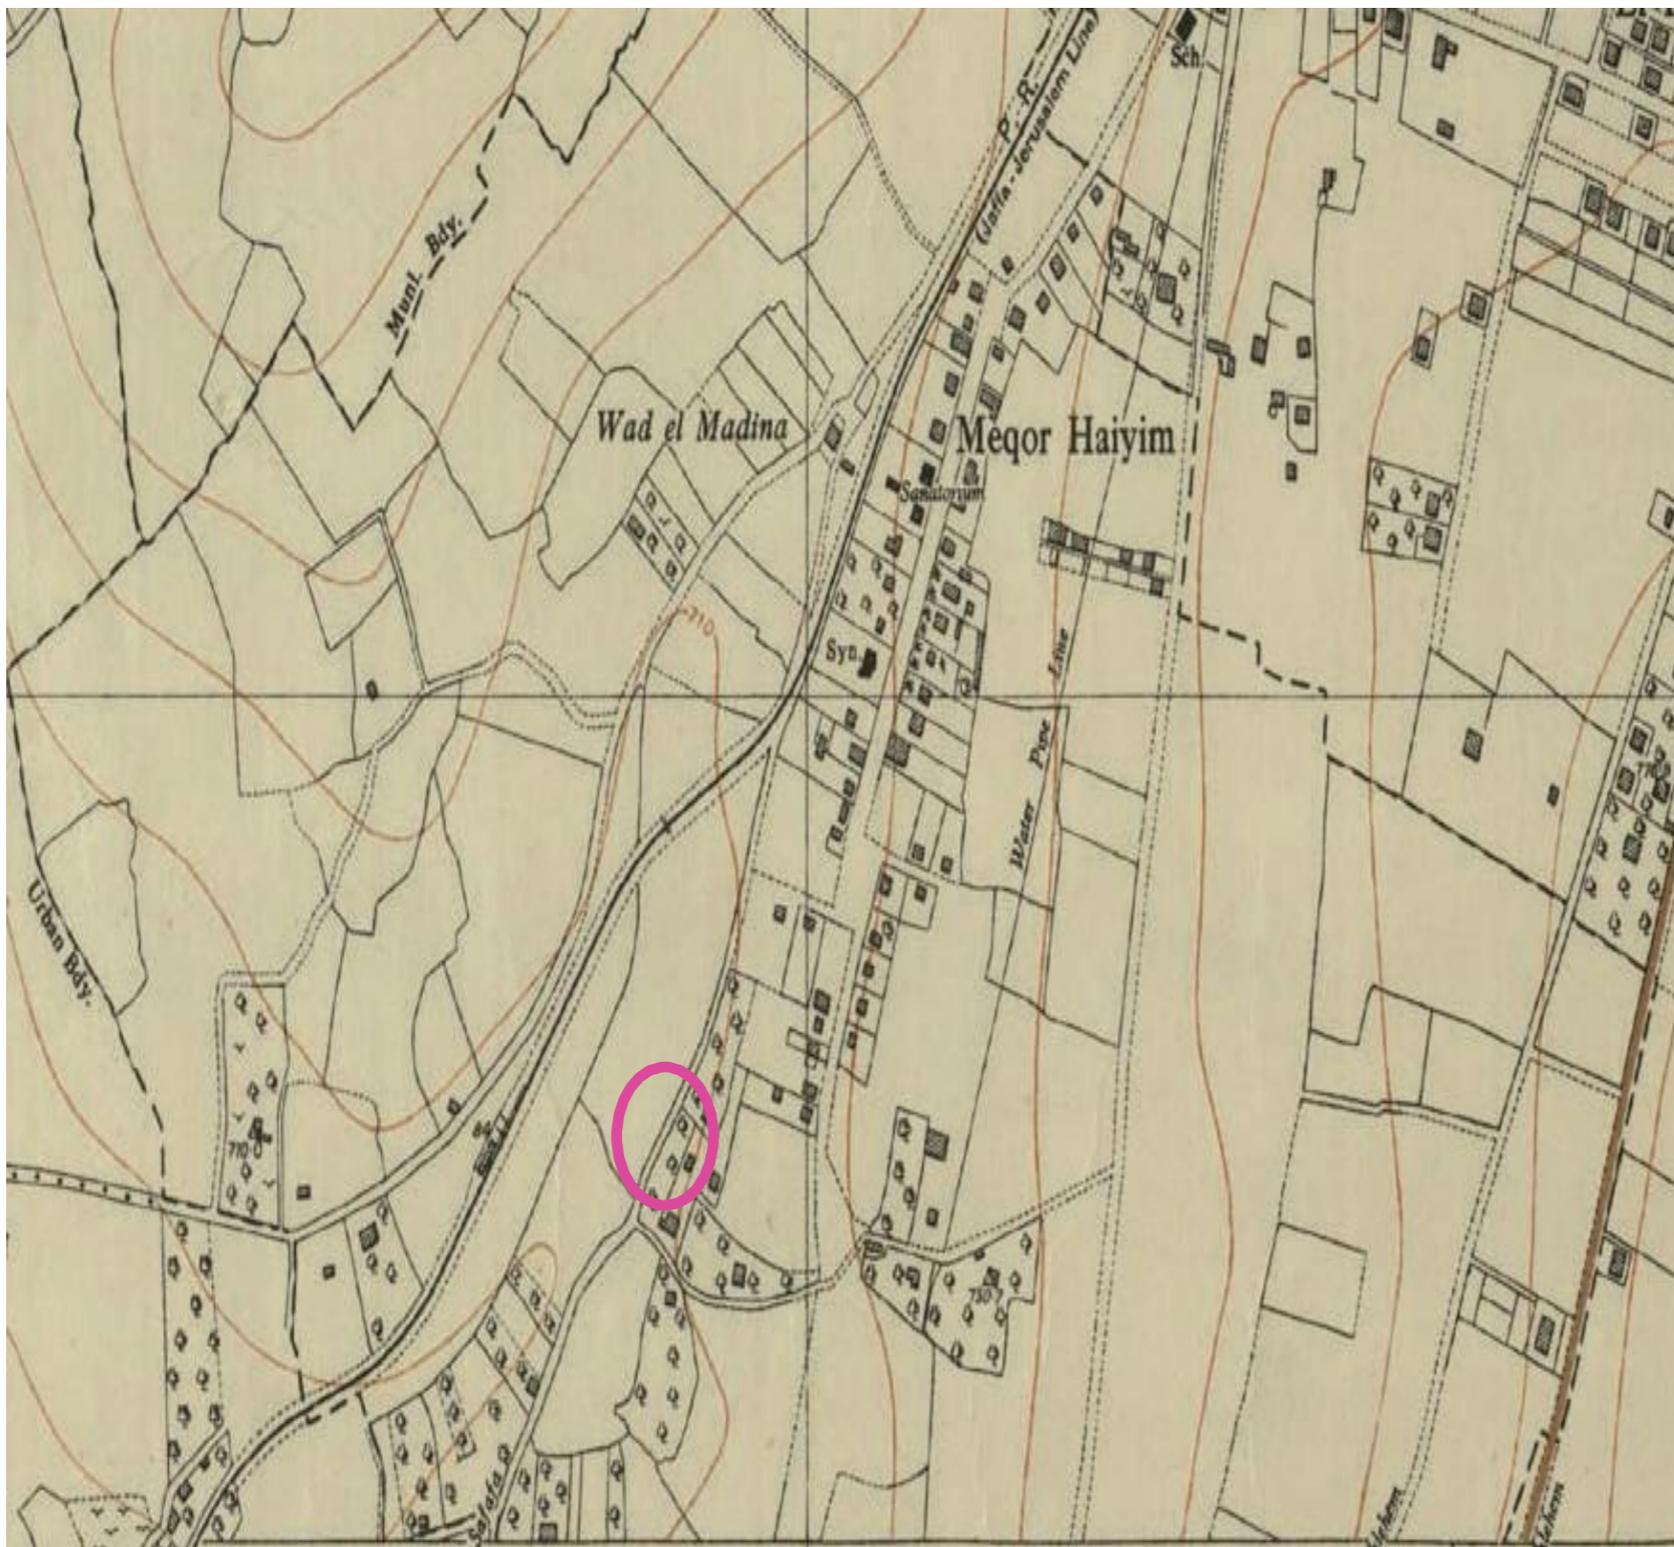

## ***The Artist's Garden***

*The Artist's garden* on the Roof is an initiative to transform the rooftop of the Art Cube Artists' Studios in Jerusalem into a thriving and engaged community and creative hub.

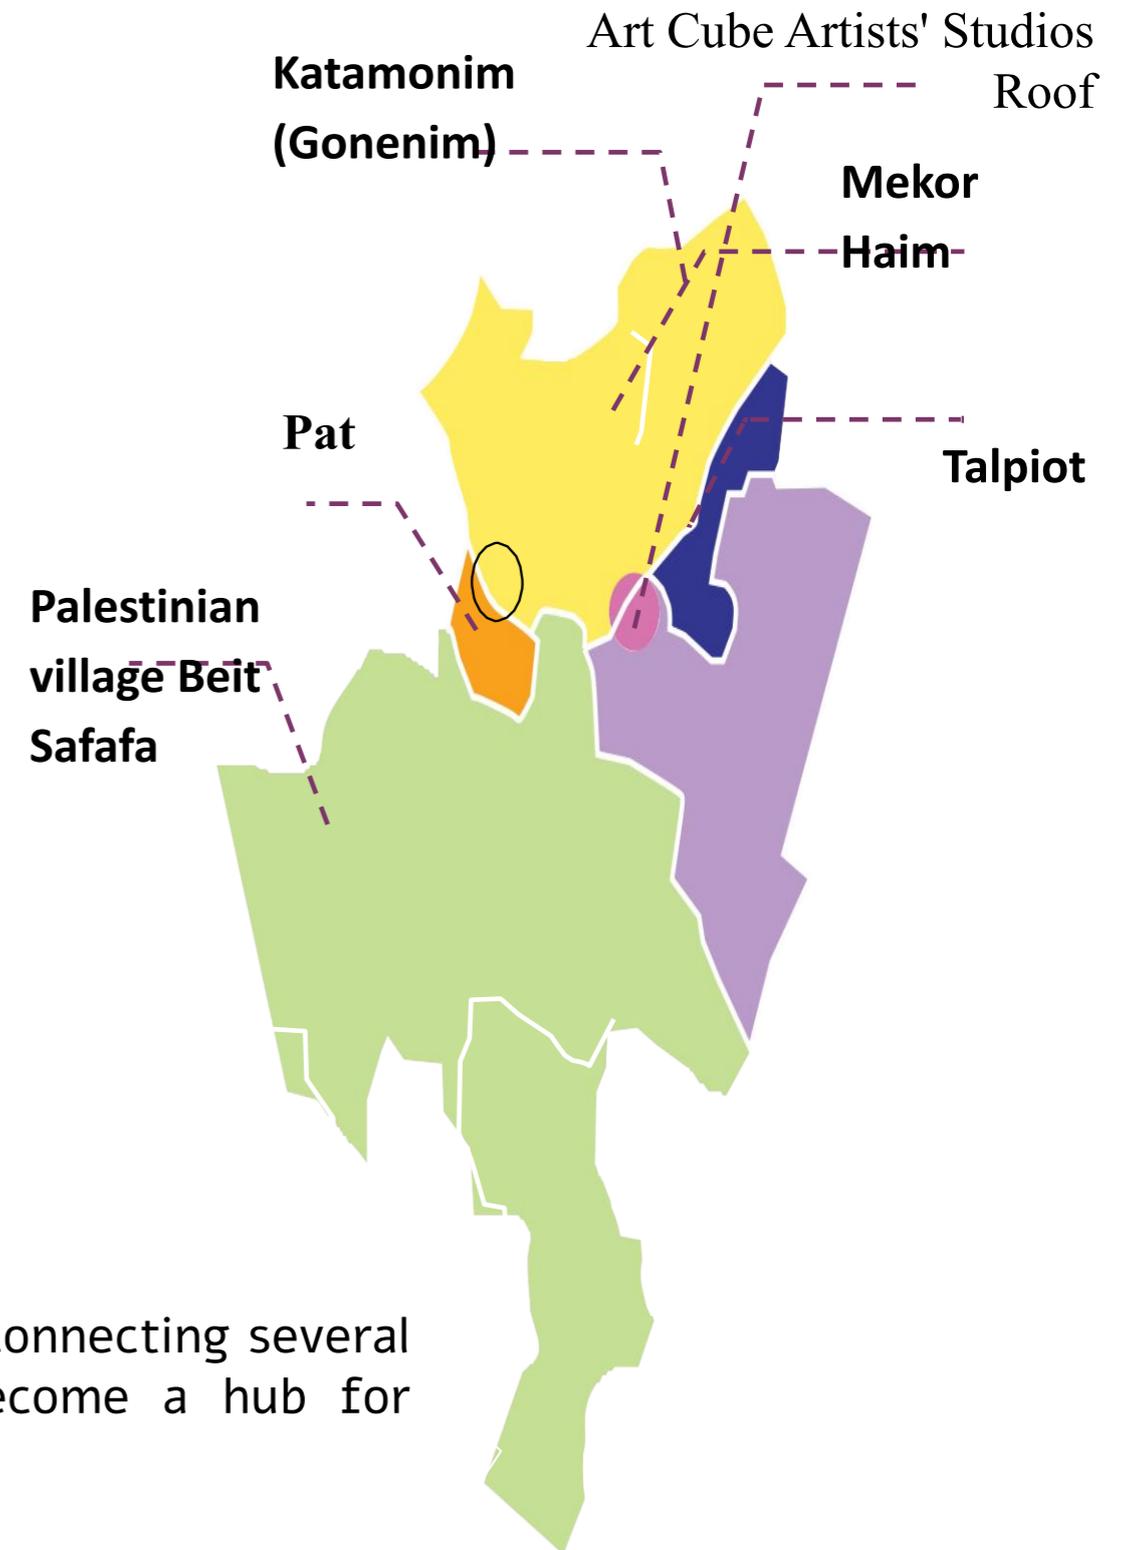

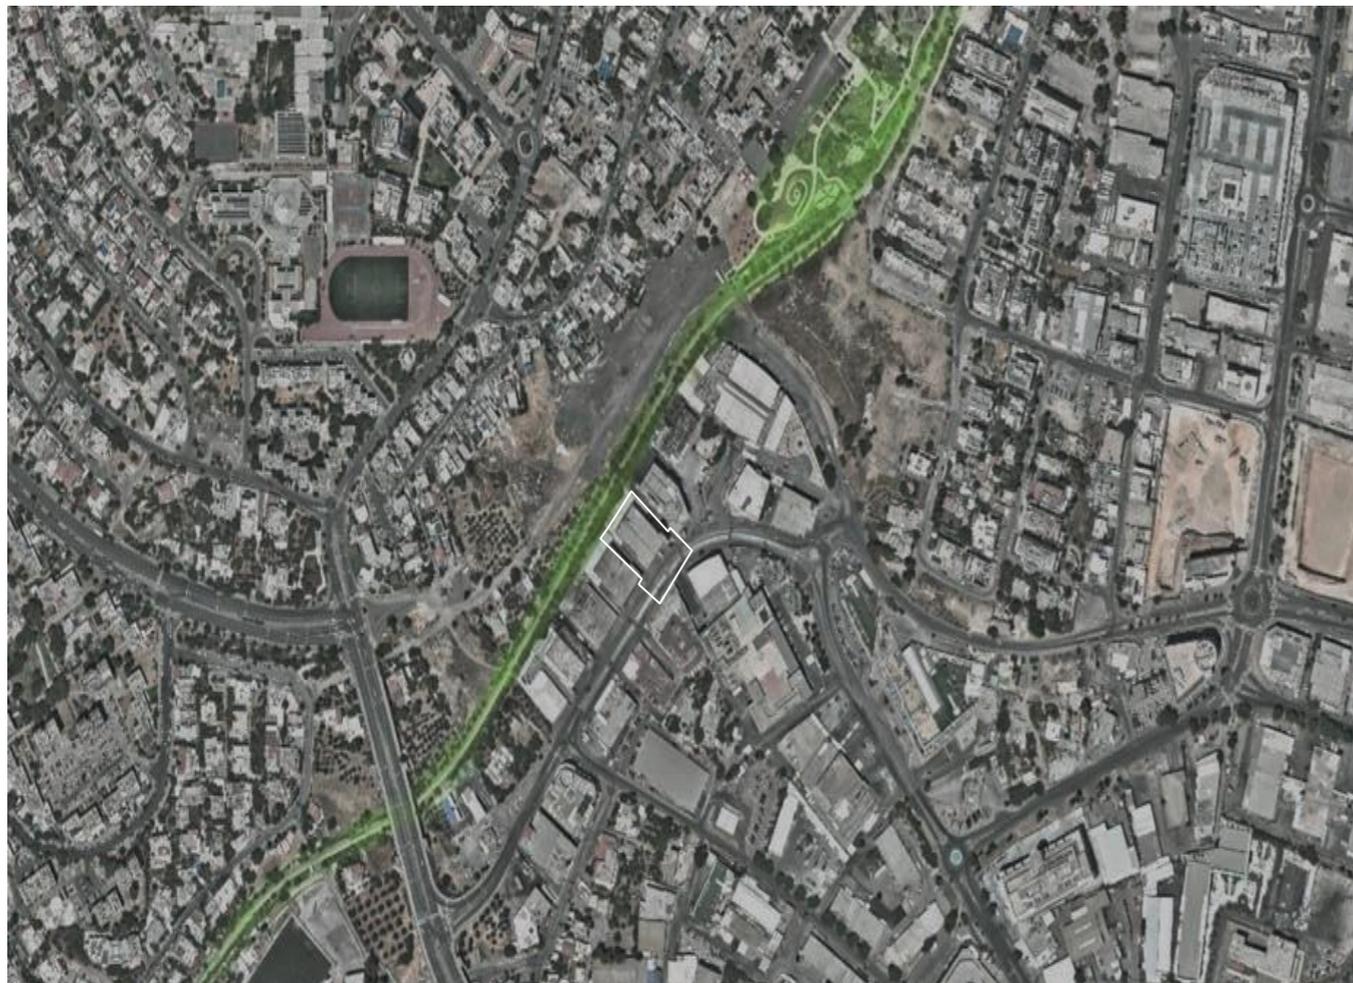

Raumlaborberlin in Jerusalem, Constructing Communities - a workshop for community building tools and methods

Background:  
The green roof  
- a junction  
for a meeting  
between  
communities

Our roof is located in the heart of the Talpiot industrial area and borders the Railway Park. Our building is located next to the historic railway track between Jaffa and Jerusalem and overlooks it. This area (which was formerly an agricultural area) is already used today as a meeting point between the residents of the neighboring neighborhoods. The vision of the green roof will enhance the encounter through the creation of a meaningful, calm, and inspiring site along this route.

# The Roof Location

The roof is located on the axis of the bustling railway park, connecting several neighborhoods with different characteristics, and will become a hub for significant meetings.
