BANLASTIC
Ban single-use plastic

Banlastic Egypt Profile

Present alternatives, for better future

WHO WE ARE?

Present alternatives, for better future

Banlastic Egypt was founded on June 2018 in Alexandria, Egypt by 3 co-founders of diverse backgrounds for a common cause of "banning single-use plastic". We do this by producing and developing alternatives to the single-use plastic, creating a base of aware customers by conducting workshops to create eco-friendly workspaces like offices, educational institutions and others, organising beach clean-ups and connecting with policymakers to support those efforts with plastic ban policies.

Banlastic Egypt is actively stepping up its pace of expansion all over Egypt. Today our products and services are sold in more than 4 governorates with the possibility of widening the market. We are committed to sustainably growing the global eco-friendly products market, guided by the mission to benefit humans with environmental preservation, and aligning with the company's core values of customer focus, open-mindedness, mutual respect and the pursuit of excellence.

The name is derived from the sentence "ban the plastic" to replace the word plastic and creating a mindset to the customer for proper awareness.

WHO WE ARE?

VISION

We aim to ban the single-use plastic in Egypt to contribute to the global action against the plastic catastrophe.

MISSION

- Customer awareness.
- Providing alternative solutions.
- Policy incentives for the public.

CORE VALUES

- Environmental advocacy
- Encourage learning.
- Cooperation between institutions.

GREEN SERVICES

- Beach cleanups.
- Interactive environmental trainings.
- Green conferences.
- Webinars.

WORKSHOPS AND TRAININGS

We aim to build capacities around Egypt for a new generation of environmental leaders to break the centralization pattern. On the last day in our trainings, we plan for offline green action to explore the real-life applications and the learned advocacy tools.

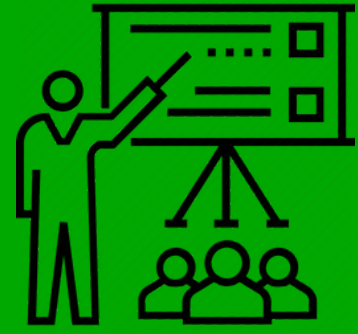

BEACH CLEAN-UPS

We offer opportunities for people and groups to get engaged and spread awareness among the public, beach visitors, and our community in our public and private beach cleanups. We segregate waste and give plastic and metals to recycling companies or waste sorters.

GREEN EVENTS AND CONFERENCES

Through movie screenings, green conferences, talks and round table discussions of various environmental experts and activists, we raise awareness on single-use plastic and other environmental topics.

WEBINARS

Due to COVID-19 and the changes that occurred in the world during 2020, we adapted to the lockdown status and held webinars to continue with our activities, our impact and to ensure the continuity of spreading environmental awareness.

EXPLORE OUR PRODUCTS

Check our Stylish and Environmental Friendly mode products.

TOTE SHOPPING BAGS

- Self-folding design.
- Customised from 250+ bags
- Employs women in marginalised communities.

PAPER PACKAGING

- 30*30*10 cm.
